

The Value of...

Literary studies has emerged from a period of heavily theoretical criticism and, as a result, the value of literature is being addressed now in a concerted and energized manner. These books aim to exemplify and showcase that vein of evaluative literary criticism by putting critics of international stature into contact with key authors, genres and topics.

Taken together, the volumes in the *The Value of* series amount to a significant examination of the values of and the values in literary studies today.
